13.20 gal Bins Kit

Casters for easy movement.

A set for separation and selective collection of waste, both indoors and outdoors. The 3 different types of lids favor the suitability of the sets to different types of use. The lids prevent the view of discarded waste, the dispersion of odors, and the entry of insects.

Kit composition:

- 04 Units - 13.20-gal Garbage Bins with handles (4 colors)
- 04 Units - Lids of the same model (selectable)
- 04 Units - Modules with casters (10 casters)

13.20-gal Garbage Bin with Handle

The 13.20-gal bins in the kit are extremely sturdy and have rounded corners to facilitate their cleaning and not retain dirt. The handles facilitate the removal of waste bags and garbage bin movement.

Collector System Modules

Swivel casters provide movement agility to the set. Only available in grey.

Waste Collection

Street Cleaner Bins

Street Cleaner Bins for collecting and transporting general waste and garbage. Parts such as axles, covers, and casters are supplied as spare parts.

Street Cleaner Bins, Special Lid, 27.24- or 54.48-gal

Indicated for external use in medium/large areas with a high circulation of people. Its special lid prevents the dispersion of odors and protects the contents from water ingress. 7.87-in or 11.81-in casters to make it easier to move the collector for both waste disposal and cleaning and sanitizing.

Special lid, waste disposal, no hand contact.

Janitorial Carts

Janitorial Carts

America Janitorial Carts

Excellent for optimizing the productivity of cleaning tasks, as they safely and conveniently transport various equipment, accessories, and products. Standards for several activities in health services, aiming at accident prevention and physical integrity protection of the workers.

America Janitorial Cart, PAN Version

An ideal cart for small areas such as schools and condominiums, where there is no need to attach a bag to collect items.

Code
CF200P

The lid of the America Janitorial Cart is multifunctional:

- Stores and carries accessories and other items.
- Allows the placement of an acrylic sheet for fixing cleaning schedules (optional).

Lid model of the Black America Janitorial Cart.

Cube Carts

Made of medium-density polyethylene, with fixed and swivel wheels and a central balance system that allows for easy maneuvering. They are ideal for collecting hospital waste, clothes in laundries and hotels, transporting waste in gastronomy areas, among others. Optional parts include lids and spring-loaded systems that lift the platform from the bottom towards the opening of the car, providing excellent ergonomics for the operator.

See also 3-inch or 6-inch rubberized casters.

Equipped with drain for liquid waste disposal and easy cleaning.

With Metal Structure

Manufactured in white or gray colors only. Other colors are available upon request.

Lifting platform at the base of the cart to optimize ergonomics, keeping the contents always close to the top.

Carts are manufactured in white and gray colors. Other colors are available upon request only.

Individual	22.04 in	14.17 in	27.55 in	9.47 lb
Packed	22.44 in	14.96 in	14.96 in	10.36 lb

The partition is injected into the bucket body itself, providing unparalleled durability. Rounded corners facilitate post-use cleaning and elimination of contamination.

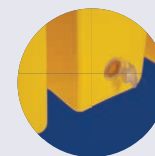

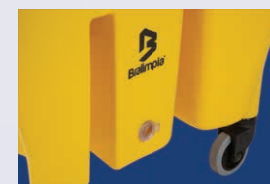

The horizontal wringer system provides uniform pressure on the refill, removing moisture according to the operator's need.

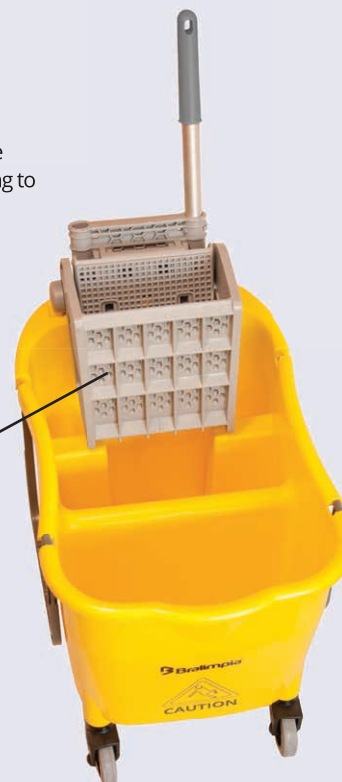

Made in 4 colors

The most effective system to integrate cross-contamination prevention efforts. The colors allow the assembly of operational plans identifying the areas and environments in which the buckets can be used.

Colors BL GR RD YE

The 2-tank system (clean water + dirty water) optimizes cleaning efficiency, removing dirt and contamination from floors. Drain for disposing of dirty water directly into drains, tanks, or sinks.

Wet Cleaning

Doblô 30 Wringer Bucket

- Wringer system with superior pressure.
- Drain for dirty water runoff.
- Clean and dirty water partition injected into the bucket body itself.
- Total bucket capacity = 7.92 gallons (3.17 gallons + 4.75 gallons).
- Casters designed for easy maintenance and cleaning.
- Usable with flat/upright mop (optional).

Wet Cleaning

Multipurpose Rectangular Bucket

6.60-gallons rectangular buckets.
Made of polypropylene, they include:

- Reinforced body with rounded internal corners to prevent dirt deposits.
- Smooth surfaces for easy sanitizing after use.
- Reinforced and ergonomic carry handles.
- Supplied in 2 colors (Red and Blue) to identify areas where they must be used, separation of chemicals and cleaning solutions, or for the Bralimpia Flat Mop Wet cleaning system.

Airtight Lids

The airtight and translucent lid prevents spills and the dispersion of contaminants present in the refills after use.
Lid locking system through 8 latches that optimize security.

Wet Cleaning System - Flat Mop

Rectangular buckets can be used with the Bralimpia Flat Mop System, as they are produced in 2 different colors.

The first bucket is used to moisten the microfiber refills with the detergent or disinfectant solution, leaving them ready for use.

The second bucket receives the used refills so that they can be safely taken to the subsequent processing and sanitization.

In this way, the particles and contamination in the refills will not contaminate other surfaces or people and will not be dispersed throughout the environments.

Individual	55.11 in	5.31 in	3.54 in	3.53 lb
Box with 4 units	47.24 in	9.64 in	9.64 in	15.25 lb

Note: See also optional 19.29-in refill

Flat Mop Frame

AFM4511 - Width: 4.33 in

AFM459 - Width: 3.54 in

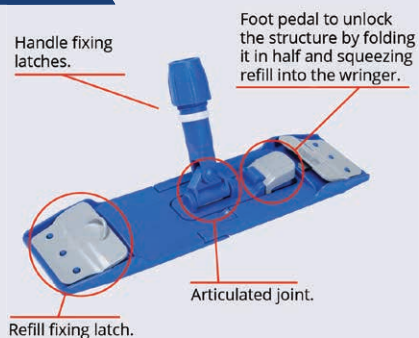

Aluminum frame with articulated joint for microfiber refills used for cleaning floors in general. Extremely smooth and uniform surfaces that can be easily sanitized, optimizing cleaning safety.

Description	Length	Width	Packaging	Weight	Code
Individual	17.71 in	3.54 in	1.96 in	0.7 lb	AFM459
Packaging with 4 units	53.14 in	4.72 in	17.71 in	3.04 lb	MVAFM459
Individual	17.71 in	4.33 in	1.96 in	0.88 lb	AFM4511
Packaging with 4 units	53.14 in	4.72 in	17.71 in	3.74 lb	MVAFM4511

The powerful Velcro fastens the refills in order to exert uniform pressure and apply the cleaning solution evenly, optimizing the cleaning results.

Flat Mop Frame

The polypropylene frame holds cotton or microfiber refills and can be folded to be used in horizontal wringers. Strong plastic grips secure the refills, providing uniform pressure on the floors and increasing their durability.

Description	Length	Width	Height	Weight	Code
Individual	15.74 in	4.33 in	1.96 in	0.83 lb	AMP400
Package with 3 units	21.65 in	9.84 in	3.93 in	2.53 lb	MVAMP400

* Sold only in boxes of 3 units

To be used with vertical wringers, as in the Doblo Flex line. Uniform pressure throughout the refill facilitates the removal of excess moisture.

Wet Cleaning

Wet Mop Microfiber Refills

Indicated for tile flooring cleaning systems. Microfiber mesh with ultra-fine Polyester synthetic yarns, providing greater capacity for dragging dirt and absorbing liquids. Much better results when compared to common cloths and natural fiber refills.

Signaling Cones

Complete Sets

CONE + SAFETY SIGNS

A complete system of signaling and demarcation of environments and spaces. Made of polypropylene, extremely sturdy for both indoor and outdoor use.

Scratch-resistant engraving prevents premature equipment wear.

PERFECT FOR SOCIAL DISTANCING ACTIONS!

They can be used together with plastic chains or plastic demarcation tapes in companies, shops, restaurants, clubs, and others. Perfect for organizing spaces such as queues and reserving areas and spaces, restricting access to construction works, etc.

Fitting for plastic chains (sold separately) to reserve spaces, organize queues, demarcate areas, or prevent access.

Easy assembly and disassembly of sets and easy handling throughout environments.

With a total height of **45.66 inches**, the cones signal efficiently and with excellent visual appeal. Made of polypropylene, extremely sturdy and easy to transport.

They can also be used with plastic or demarcation tapes that are normally found in the market.

Standard Cones

Versatile option to assemble communication systems in varying situations.

The standard cone can be used alone or with Warning Signs in 8 different messages.

The combinations between the standard cone and the warning signs allow for the creation of different system options for signaling or demarcation of environments.

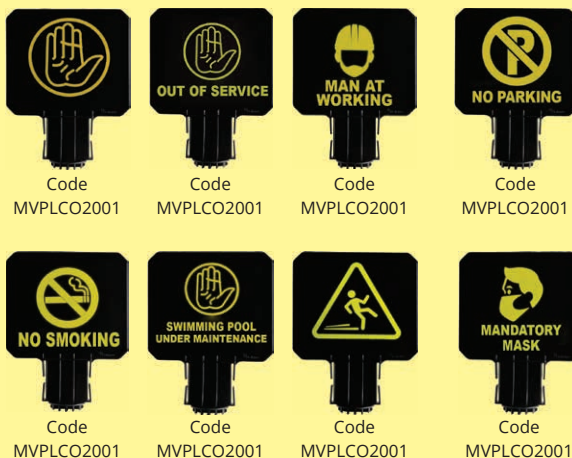

Greater economy and flexibility, optimizing safety in companies or institutions of any activity or size.

Wax Application

Wax Application Bucket

Intended for storing, transporting, and dosing the amount of waxes and finishes to be applied to the floors.
Resistant, easy to transport, and sanitize.

The nylon strainer fits the bucket body itself, being more resistant and efficient to remove excess finishes in the refill.

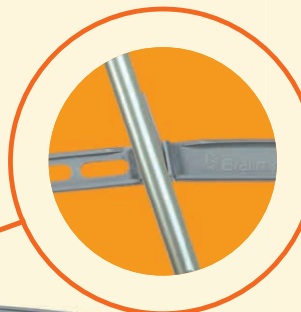

Bumps on the bottom of the bucket allow dirt to settle down and not contaminate the finishes being applied.

Hermetic and translucent lid that preserves the wax for longer and prevents the entry and deposition of dirt that would otherwise impair the quality of the applied finishes.

Carry handle with 2 fasteners to facilitate movement during applications.

Lid locking system through 8 high-precision latches that optimize security.

Floors with more even and cleaner layers provide a stronger and more resistant shine.

Dimensions	Length	Width	Height	Packaging	Weight	Code
Assembled	25.78 in	13.77 in	15.35 in		8.48 lb	BAC300
Packed	25.98 in	13.77 in	12.20 in	1 un	9.65 lb	-----

FINISH Set

Code
CJBAC300

FINISH Set composition:

- 7.92-gal polypropylene bucket.
- Nylon strainer attached to the bucket body for greater stability.
- Hermetic and translucent lid that preserves the wax for longer and prevents the entry and deposition of dirt that would otherwise impair the quality of the applied finishes.
- The applicator refill is 100% made of microfiber, providing uniform application of products.
- 4 PVC casters for easy movement.
- 55.11-in telescopic aluminum handle.

PRATIC Set

Code
CJBAC301

PRATIC Set composition:

- 7.92-gal polypropylene bucket.
- Nylon strainer attached to the bucket body for greater stability.
- Hermetic and translucent lid that preserves the wax for longer and prevents the entry and deposition of dirt that would otherwise impair the quality of the applied finishes.
- Applicator and Glove 100% made of Polyester, providing uniform application of products.
- 4 PVC casters for easy movement.
- 55.11-in telescopic aluminum handle.

Wax Application

FLAT Set

Code
CJBAC302

FLAT Set composition:

- 7.92-gal polypropylene bucket.
- Nylon strainer attached to the bucket body for greater stability.
- Hermetic and translucent lid that preserves the wax for longer and prevents the entry and deposition of dirt that would otherwise impair the quality of the applied finishes.
- Aluminum Flat Mop frame with articulated Polypropylene joint and super-adherent Velcro.
- Microfiber refills that apply waxes evenly, providing product savings and greater shine.
- 4 PVC casters for easy movement.
- 55.11 in telescopic aluminum handle.

Low-Speed Washer

- With a modern and bold design, this equipment offers double electrical isolation, making it safer for operators.
- With a “helical” gear system of permanent lubrication and low noise.
- Three-pole 10-meter long electrical cable, in compliance with ABNT standards.
- Tank capacity of up to 5 liters of cleaning solutions.

Anatomical handle injected in high-resistance and anti-shock industrial plastic.

Tank trigger.

Exclusive activation lever system (on-off) with safety lock.

Drive handle with a smart and innovative height adjustment system that eliminates the need to change pedals.

Highly durable Fortiprene injected casters to make movement even quieter.

DRY MOP - Refills and Frames

Profi

- Refill 100% made of acrylic yarns, that allow a natural static, with superior particle retention results.
- Loop closure system.

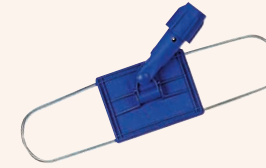

Cotton Tech

- Refill is composed of mixed yarns of 85% cotton and 15% acrylic. Developed as a looping system.
- Great for absorbing liquids.

Euro

- Refill 100% made of acrylic yarns, that allow a natural static, with superior particle retention results.
- Fixed onto the frame.

Euro Frame

Made of high-resistance polypropylene with a galvanized steel structure. Available in 40, 60, and 80 cm and designed for refills with a 12-cm width.

Plus Frame

Indicated for hospital areas, always keeping a new-looking appearance, as it does not oxidize like the metal ones. Made entirely of high-resistance, easy-to-clean polypropylene. Available in 40, 45, and 60 cm and designed for refills with a 15-cm width.

Micro Tech

- Refill 100% made of microfiber threads, with an innovative lint-free woven thread system. High retention power and abrasiveness in cleaning.
- Suitable for hospital, laboratory, and clean rooms areas.

High Tech With looping

- Refill 100% made of Polyamide threads that provide high static power.
- Its looped fiber system better retains particles and provides excellent durability.

Profi Frame

Made of high-resistance polypropylene with a galvanized steel structure. Available in 15.7- to 47.24-in sizes, and designed for refills with a 5.90-in width.
